

For Orthodontic Training

The most advanced simulation unit for in-office training for orthodontic treatment.

Mountable not only to the desk but also to dental unit chair. The jaw models are brackted with buccal tubes and wires.

The articulator has a very unique self-locking function for quick & easy mounting or demounting.

Simulated oral cavity cover with excellent elasticity exclusively arranged for orthodontic training is available as an option.

◆ Standard soft tissue jaw model with orthodontic appliance brackets

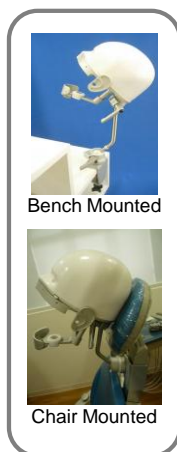

Ideal training tool for wire, lingature wire, elastomer setting and its removal or for patient education after setting.

◆ Simulated phantom head unit and simple manikin unit mountable to the desk and chair.
