

Custom training models at affordable prices

Making your own dental study model with ADEM teeth for tooth specific training.
 Upper and lower plaster models can be easily fixed in metal tray articulator (Plasterbase-La) to reproduce occlusion quickly.
 Applicable to ADEM system for those who want to practice repeatedly, no need to purchase the whole model but want to use in simulated head or manikin.

◆ ADEM Teeth for high speed cutting ◆
 (SIM-T)

Teeth can also be purchased individually.

◆ Mold ◆
 (Mold-28)

Above photos show molds used with ADEM teeth to create plaster models.

Sample image of plaster model with ADEM teeth after using with molds.

◆ Metal tray Articulator ◆
 (PLASTERBASE-LA)

** Photo Shows **
