

# Oral Cavity Cover

It is a cover that assumes the buccal mucosa membrane available in pink and transparent color to be used with our dental study models. Transparent one is for visually check of training.

OTH-013

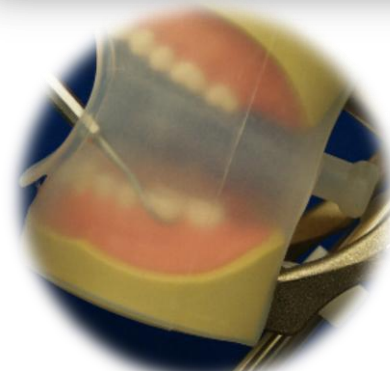

Oral cavity cover (Pink colored)

Since it is assumed clinical, not visible from the outside.

OTH-017

Oral cavity cover (Transparent)

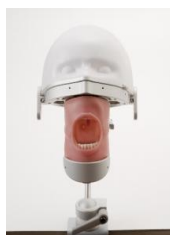

It is possible to confirm the operation from the outside of oral cavity cover. Instructors can give timely and accurate advice to proceed practical training efficiently.

We have a wide variety of dental training products in **ADEM** series to meet your demand for practical training.
